

Governance, Risk Management and Compliance for MSPs

The Challenge

GRC is a valuable strategic tool for any organization subject to regulatory compliance or at high risk of being targeted by cybercriminals, but smaller businesses rarely have the time or resources to adopt it. MSPs are well positioned to deliver these capabilities, but enterprise GRC tools are complicated and expensive. They need a simple, cost-effective way to deliver the frameworks, policies, and reporting that their clients need to demonstrate compliance and security capabilities.

The Solution

Todyl delivers a wide range of GRC capabilities designed to help MSPs provide strategic support for cybersecurity and compliance initiatives to their clients in a single, easy-to-manage, and cost-effective solution.

- **Security and Risk Assessments:** Pre-defined assessment process based on CIS allows MSPs to quickly assess individual client security postures.
- **Compliance & Risk Frameworks:** Easy assessment tool to establish adherence to specific regulatory and other frameworks with embedded evidence and automated tracking.
- **Out-of-the-Box Policy Templates:** Benefit from an extensive centralized library of security, compliance, and risk policies for easy access to detailed requirements.
- **Simple Compliance Alignment Tool:** Quickly assess which regulations may apply to a given tenant through a simple compliance assessment questionnaire.
- **Compliance Activity Tracking:** Link Todyl SIEM where applicable to any assessment and automatically track and provide evidence of specific compliance and risk activities.
- **Strategic Security Posture Insights:** Track progress against all security and compliance frameworks across individual or all tenants, with rapid drilldown into granular details.

How GRC Benefits MSPs

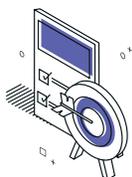

Centralized compliance management

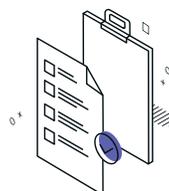

Rapid deployment and simple configuration

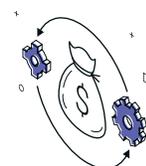

Flexible data retention policies

Easy-to-use assessment tools

Extensive out-of-the-box operating frameworks

Reduced operating overhead

The MSP Advantage

Demonstrate Cybersecurity and Compliance Capabilities:

Help clients meet and demonstrate adherence to industry regulations, compliance frameworks, and operating policies with built-in tools and comprehensive dashboards and reporting.

Deliver On-Demand Documented Evidence:

Provide documented proof of implemented policies in a centralized repository of out-of-the-box and custom policies.

Access Simplified Compliance Guidance:

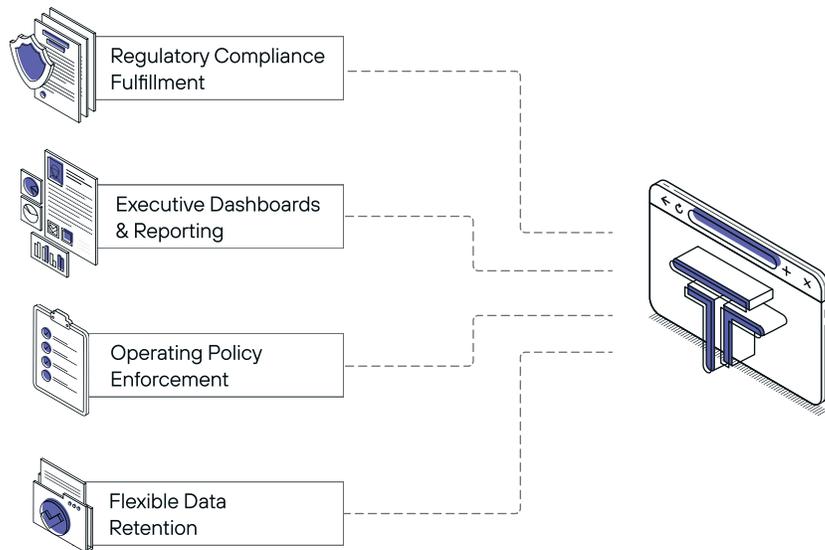

Use a simple compliance assessment tool to quickly identify which regulations and frameworks may apply to each individual client.

GRC Under the Hood

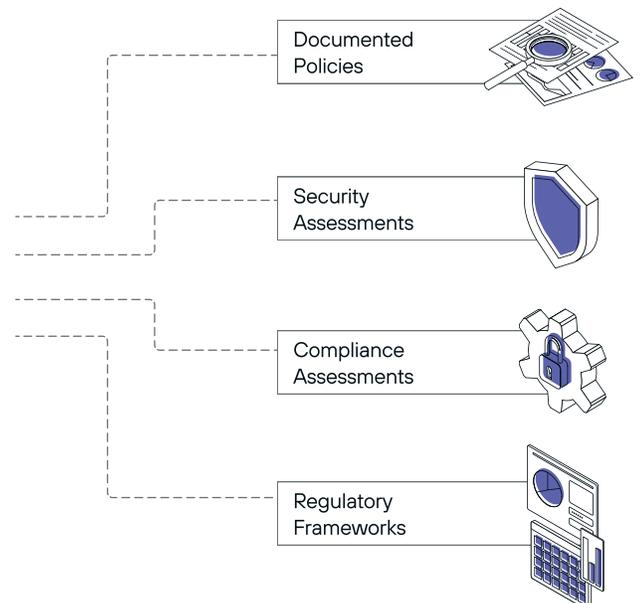

Todyl GRC delivers easy-to-use, powerful tools to implement and execute critical processes for analyzing security postures, quantifying risk, and meeting and demonstrating compliance with comprehensive coverage for a wide range of government and industry requirements.

- Automated mapping to specific regulations and requirements
- Simple assessment and attestation tools for mapping compliance capabilities
- Pre-defined and custom dashboards for relevant frameworks
- Expert-crafted recommendations and compliance insights
- Centralized management to streamline governance processes
- Multi-tenant architecture that ensure MSPs can deploy the right solutions for any client
- Extensive integrations to allow data collection and analysis data from all relevant sources

Continuous Compliance

Governance & Risk Management
