MXDR

24/7 Threat Detection & Response Without the Overhead

todyl

The Challenge

Building and maintaining a 24x7 cybersecurity operation is expensive, complex, and resource-intensive—often out of reach for small to mid-sized MSPs. They frequently struggle with alert fatigue, talent shortages, cost prohibitive tooling, and difficulty demonstrating security and compliance outcomes to clients. But without real-time threat detection and response, MSPs and their customers risk potential breaches, delayed mitigation, and compliance violations.

The Solution

Todyl MXDR (Managed Extended Detection & Response) eliminates the burden of running a 24x7 cybersecurity operation on your own by delivering always-on threat detection and expert-driven response as an extension of your team, with complete transparency and deep collaboration.

- **Fully Managed 24x7 SOC:** Continuous monitoring, detection and response by skilled security analysts who manage and optimize each tenant's Todyl security stack.

- **Proactive Threat Hunting:** Expert security analysts help proactively identify and mitigate threats before they escalate into major incidents for your end customers.

- **Detection and Response Transparency:** Incidents are clearly presented in fully contextualized cases, delivering full visibility into the status and scope of any investigation.

- **Seamless Collaboration with Your Team:** Todyl MXDR acts as an extension of your team, collaborating via preferred communication channels 24x7x365.

- **Rapid Incident Response & Threat Mitigation:** MXDR experts and automated playbooks take immediate action to neutralize threats before they impact your business operations.

- **Identity Threat Detection & Response:** Todyl MXDR investigates anomalous identity usage and account access 24x7 to quickly detect and respond to identity-based attacks.

How MXDR Benefits MSPs

24×7×365 cybersecurity operations
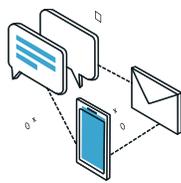

Multi-channel communication (Slack, Teams, phone, e-mail)

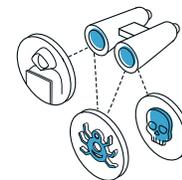

Dedicated detection and response expertise

Strategic posture checks and recommendations

Collaborative investigations and incident response

Continuous threat hunting

The MSP Advantage

24x7 Detection and Response Without the Overhead: Deliver 24x7 expert anomaly and threat detection and rapid response without the high cost of an in-house SOC.

Clear, Actionable Security Insights: Provide deep threat context and expert remediation guidance in actionable, easy-to-understand incident response cases.
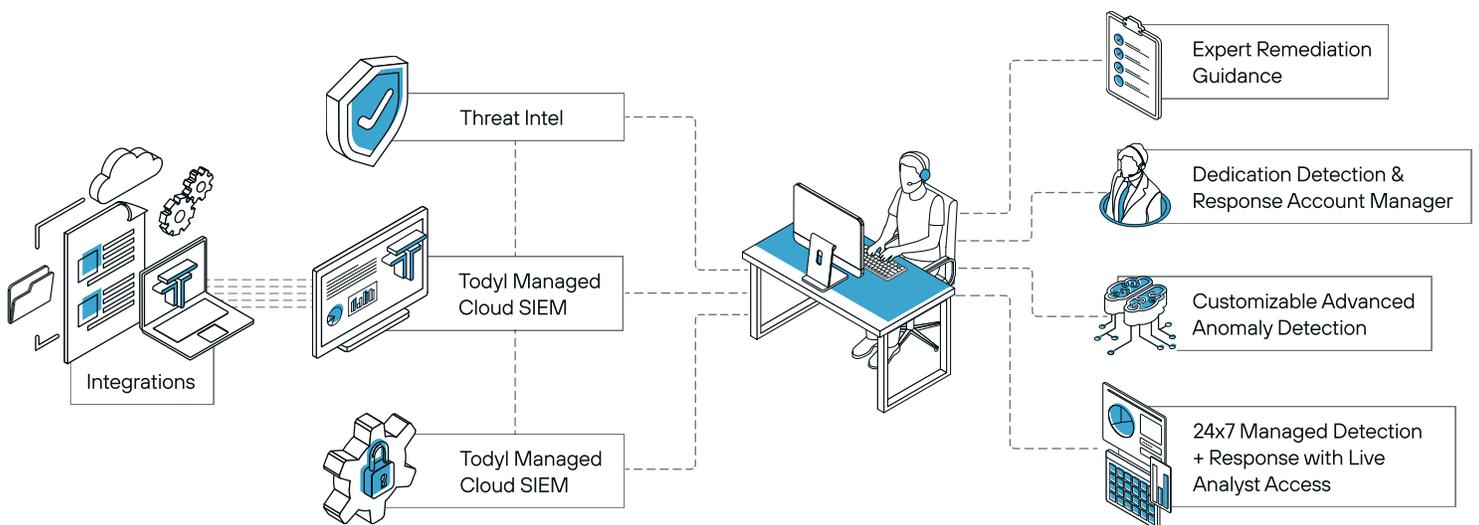

Complete Visibility and Effortless Control: Maintain complete oversight with 24x7 situational awareness and direct communication with Todyl's MXDR team at all times.

Strategic Cybersecurity and Compliance Solutions: Benefit from collaborative cybersecurity and compliance planning and expert guidance.

MXDR Under the Hood

Todyl MXDR delivers expert 24x7 detection and response services for MSPs and their end customers, with expert remediation guidance and strategic security posture planning at a fraction of the cost of homegrown solutions.

- Expert analysis of potential threats with proactive notification of critical threats
- 24x7 expert ITDR services for Microsoft 365 and Azure environments
- Always on availability via preferred communication (phone, email, Slack, Teams, etc.)
- Dedicated Detection and Response Account Manager (DRAM)
- Enterprise log management and SIEM for security analytics and continuous compliance
- Expert defined advanced anomaly detection and security automation playbooks
- Seamless integration and onboarding of all Todyl solutions (SIEM/SASE/LZT/EDR/GRC)

Integrations

Threat Intel

Todyl Managed Cloud SIEM

Todyl Managed Cloud SIEM

Expert Remediation Guidance

Dedication Detection & Response Account Manager

Customizable Advanced Anomaly Detection

24x7 Managed Detection + Response with Live Analyst Access

Ready to Grow Your Cybersecurity Business?

Todyl MXDR enables MSPs to deliver 24x7, best-in-class threat detection & response, scale efficiently, and enhance client trust—without the high cost and complexity of operating their own SOC.
