

Simplifying Network Security & Secure Connectivity for MSPs

The Challenge

Delivering airtight network security while ensuring reliable performance is a constant battle. Clients demand zero-trust security and anytime, anywhere access, but enterprise security solutions are complex, siloed, and difficult to scale. MSPs need frictionless, scalable, and cost-effective solutions to simplify network security without adding operational headaches.

The Solution

Todyl Secure Access Service Edge (SASE) delivers a fully integrated, easy-to-manage solution that empowers MSPs to secure client communications, protect their remote users and help them enforce zero trust policies to meet their cybersecurity and compliance requirements.

- **Always-On, Secure Communications:** Deliver all the capabilities of a VPN solution, without the operational user experience headaches.
- **Secure Global Network (SGN):** Provide the fastest and most secure connections anywhere in the world based on easily configured conditional access policies.
- **Zero-Trust Network Access (ZTNA):** Ensure only the right users get the right access through identity-based security.
- **Multi-layer Network Protection:** Secure clients at every access point with next-generation firewall (NGFW), Secure Web Gateway (SWG), Secure DNS, and more.
- **Optimized Performance:** Reduce latency and boost efficiency with intelligent traffic routing and SD-WAN capabilities.
- **Adaptable Solutions for MSPs:** Benefit from multi-tenant control, policy automation, and seamless integration with flexible, cost-effective solution packages.

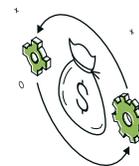

How SASE Benefits MSPs

Comprehensive network security

Swift, scalable deployment

Overhead cost reduction

Fastest secure remote connections

Ongoing internet-based threat prevention

Identity-driven network access

The MSP Advantage

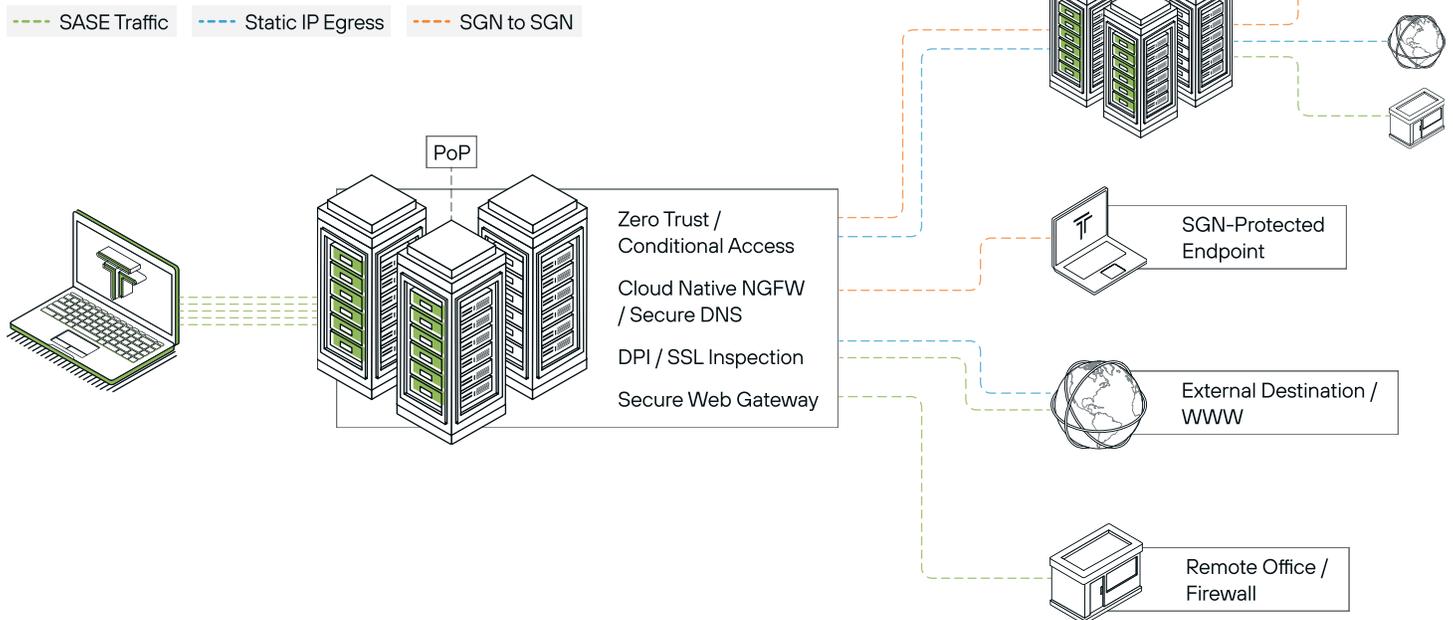

Deliver True Secure Connectivity: Offer your clients zero-trust security, optimized network performance, and seamless cloud access — all in one solution.
Simplify Operations & Reduce Costs: Replace multiple security and networking tools with a single cloud-native platform that scales with your business.
Enhance Client Retention: Provide a frictionless, high-performance security solution that ensures reliable, secure connections for modern workforces.

SASE Under the Hood

Todyl SASE consolidates over a dozen network security tools to make it easy for you to enable secure, compliant remote connections for your clients

- **Secure Global Network (SGN)** delivers the fastest secure connections for endpoints from any location
- **Secure Web Gateway (SWG)** enables seamless secure connections from anywhere
- **Next-gen Firewall (NGFW)** stops external network threats without on-prem hardware
- **Secure DNS** proactively manages end user browsing experience
- **Web Filtering** prevents traffic to malicious and non-work-related websites
- **SSL Inspection** catches hidden threats coming from the Internet
- **Conditional Access Policies** enforce zero trust network access based on user, device, location, etc.
- **Intelligent Routing** ensures the fastest and most reliable connection based on policy and location

Intelligent Routing

Ready to Grow Your Cybersecurity Business?

Todyl enables MSPs to secure, streamline, and scale their business. Let's talk about how you can deliver best-in-class security outcomes from day one.
