

Todyl **_protect what you build**

Todyl partners with MSPs by offering a comprehensive cybersecurity platform with adaptable threat prevention, detection, response, and compliance delivered through a single agent and interface. The Todyl Security Platform enables faster go-to-market and helps you capture broader market share by integrating SASE, EDR/NGAV, SIEM, MXDR, SOAR, and GRC into a single, easy to deploy and manage solution. Our products are backed by 24/7 expertise and dedicated resources, helping you deliver immediate value to your customers.

Todyl Delivers Comprehensive:

Prevention

- Zero Trust enforcement for internal and external connections
- Continually updated NGAV protection
- Next-generation network access control
- Integrated IPsec, NGFW, secure DNS, and content filtering

Detection

- Real-time analytics across endpoints, users, networks, and clouds
- 24/7 expert MXDR services with continual threat hunting
- Integrated SSL inspection, DPI, IDS/IPS, SIEM, and EDR
- Advanced forensic investigation capabilities

Response

- 24/7 remediation guidance
- Automated response playbooks
- Centralized case management
- Context-driven threat visibility and insights

Compliance

- Log collection with flexible retention periods
- Prebuilt dashboards and reports
- Real-time continuous compliance monitoring
- Enforce endpoint, network, and user security

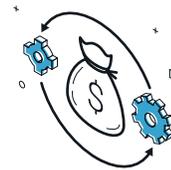

Key Benefits

Single-agent
Deployment

Immediate
Security value

Scalable and
Cost-effective

Modular
Architecture

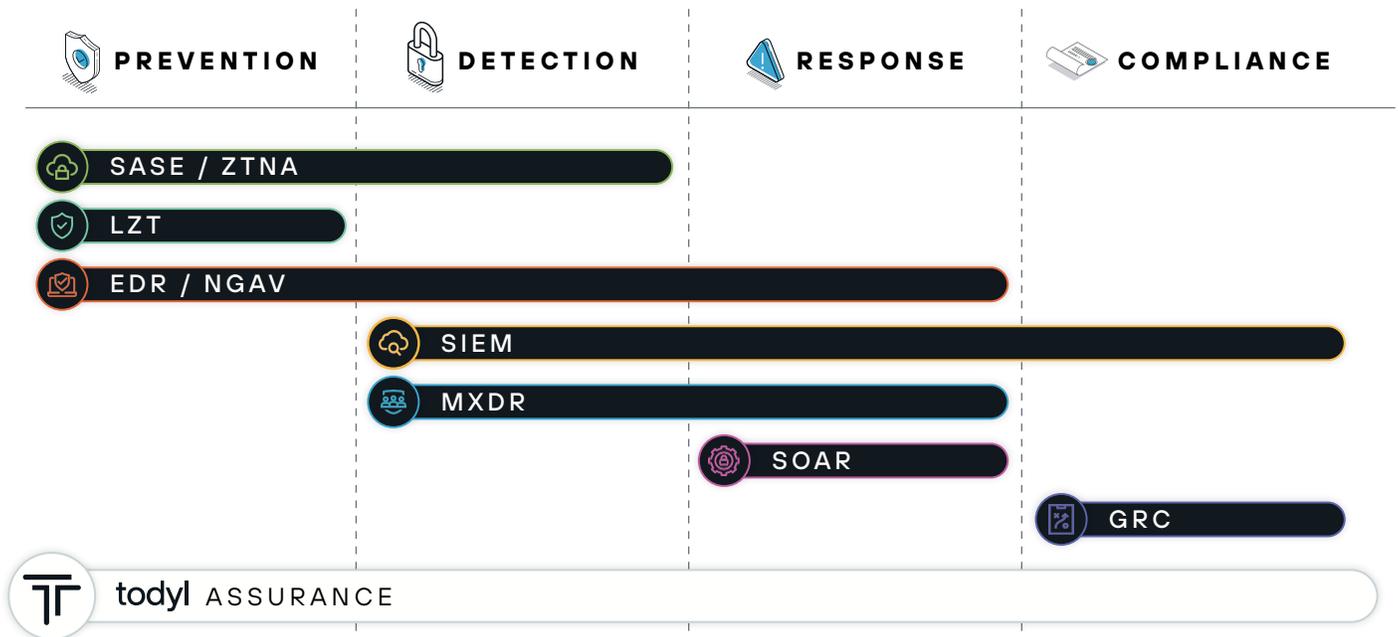

24/7 expert
SOC support

Intuitive unified
Interface

Todyl seamlessly consolidates a broad range of critical security capabilities into a single, easy-to-use platform. All solutions are integrated together, giving you unprecedented prevention, detection, response, and compliance across your entire customer base. And Todyl's modular architecture makes it easy to deploy the right solutions for each of your clients.

SASE / ZTNA

- Scalable, high-speed secure communications from anywhere
- Integrated identity awareness and conditional access control
- Network Protection (Secure DNS and NGFW) with integrated IPsec
- DPI/Traffic Filtering (Web Proxy, SSL Inspection, and Content Filtering)
- Consolidates 12+ network security solutions in one

SIEM

- Managed cloud platform with extensive integrations
- Advanced anomaly detection
- Powerful, simple search for rapid investigations
- Detailed case management for streamlined incident response
- Flexible data retention for compliance

EDR/NGAV

- Real-time NGAV protection against advanced endpoint attacks (ransomware, in-memory, etc.)
- 1,000s of pre-built detection rules and ML-based behavioral analysis
- Scanning on all files during creation, deletion, and modification
- Full MITRE ATT&CK mapping
- Extensive telemetry for detailed forensic analysis in Todyl SIEM

MXDR

- 24x7x365 detection and response with live access to SOC analysts
- Dedicated resource for threat response and security posture planning
- Full transparency across threat detection, forensics, and compliance
- Ongoing threat hunting with proactive alerting
- Integrated SOAR for automated response

SOAR

- Simple playbook builder for rapid deployment
- Automated, immediate response to critical threats
- Integrated with Todyl case management with one-click execution
- Automatic tracking of all actions for compliance and reporting

GRC

- Dashboards mapped to specific regulations and guidelines
- Compliance Assistant to assess adherence to regulations and policy
- Customer Security Assessment to document and demonstrate readiness

LZT

- Zero Trust access control for internal networks
- Deny-by-default lateral movement protection
- Enforce conditional access to critical resources
